

Dear future Team Family

In 2017, we've organised the Family Village at SHA2017. In this letter, we try to transfer some of the things we've learned.

First thing is that FV was received very positively and was considered much better organised than the family village during OHM2013. The field was packed, with many kids from small babies to near teenagers, tons of workshop and a very well used play tent. Overall a great success.

For SHA2017, the PL (projectleiding, core orga) took Family Village very serious while planning the event:

- There were three fields for sole use by the FV;
- When the original fields were unusable due to rain, two other fields originally destined for orga itself were provided;
- Noise on the camp was organised from loud to quiet in a way to minimise noise at FV;
- There was a large budget (15000 euro, mostly sponsored explicitly for FV) for FV to be used;
- Two large tents were provided (10x15m); and
- FV was an actual orga team, not a normal visitor-village.

The actual organisation of FV had a slow start, but it was taken care of by a small team in the last two months before the camp. Even this small amount of time was sufficient for a very nice FV.

Things that helped or could have helped during organisation:

- Drop the "Village" part of the team name. For SHA2017, the name Family Village has created endless and unnecessary confusion, as a village has no special status, but a Team does. Team "Family" should be sufficient. This prevents confusion and better clarifies that team "Family" is here to make the entire event family friendly. The actual area could be name Family Zone, Family Town, maybe even Family Village, as long as the team is clearly identified as such. PL called us internally Team:Frisbee to avoid confusion ;)
- Include different folks in the team: folks without kids, people with near teens and folks with small kids and babies. All three are needed, as people forget about the needs and requirements of different age groups.
- Have (bi-)weekly mumble meetings and increase the frequency towards the event.
- Have a team lead that was present at all main orga meetings was very useful since all important contacts were already made.
- Focus first on the fundamentals (toilets, showers, power, network, phone, waste);

- Then focus on the child safety and infrastructure (furniture in the FV tents, child bracelets, fields only for families, less noise); and
- Finally provide infrastructure for community projects and plan some projects as a team (create workshop program, focus on communication, arrange ball-pit, sand-pit, bouncy-castle, etc.).
- Keep notes of each meeting.
- Keep up-to-date todo/requirements lists.
- Explicitly ask for input and prior experiences of parents that have been to hacker camps and have organised kids-friendly events before.
- Keep wiki up-to-date for easy contribution by other teams (most of the time, we just write what we need on the wiki and other teams already arrange it).
- Just before the event, heavy rainfall made us move to new fields. Since the plans were written down, it was easy to see what needed changing.
- Be able to directly reach out to all buyers of kids tickets. Make sure your ticket infra supports gathering those buyers.
- Focus not just on the village, but make the event in total family friendly:
 - ▶ Get child-bracelets for parent-phone-numbers to be distributed at the entrance;
 - ▶ Make sure that child size hi-vis vests and event t-shirts are arranged;
 - ▶ Actively plan the placement of the family area away from noise and make clear agreements on noise limit enforcement;
 - ▶ Communicate clearly to visitors that do not wish to be near kids that this is kid rich area; and
 - ▶ Involve Team:Content early on, to clearly have kid oriented content in the call for proposals.
- Make a clear decision early on whether to organise official daycare or not. While it is costly and must be organised using a certified firm, having it is a great asset for the event, as it liberates both parents to actively take part in orga, do angel shift, go to talks or just rest a bit. Even if it is for a few hours, it is great. EMF2016 had it, and was a great success.
- Keep in mind that there is a small but loud minority in the hacker community that feels that kids should not be welcome at these events, as this limits their ability to have fun in their way (noise, etc). If this becomes a problem, remind them that just a few years ago they were kids themselves, and how they would have felt if they were taken to such an event by their parents when they were 10.

During the event, everything came together and there was a very nice family village. This is also where we learned many things.

Build-up/Tear-down:

- We lacked a proper plan for build-up, which made for a few people doing a lot of work. We even had to set up the very basics, such as fire lanes. For tear-down, we created a plan which helped a lot in the distribution of work.

- Build-up is a dangerous period for unsupervised kids, we experienced several unsafe situations. Kids running unsupervised on the main roads, without hi-vis vests, not being seen by manitou and truck drivers is asking for trouble. Since many buildup-angels and orga bring families, FV should be at least somewhat operational as early as possible in the buildup, so that small children are kept occupied and concentrated in a safe part of the field. E.g. get the bouncy castles and ball pit on the field ASAP.
- If the scouting terrain in Zeewolde is used again, order in advance sufficient length of chicken wire and poles to make the fence towards the ditch, integrate this with the overall fencing plan of the orga.
- We had DECTS, which was great, but they don't work buildup/teardown. For this we had a portofoon, but rarely used it. Having a proper build-up plan can include having a dedicated portofoon that is always manned.
- Give away most of the stuff (art supplies, child chairs, inflatables, etc) with families. Special things like the bamboesticks and frisbee-set were donated to scouting. Properly communicate this and everything is gone within hours.

Organising:

- Daily meeting at 10:30 helps with keeping on top of things, make sure this is properly communicated and make sure the team leads show up. Doing this at the field (i.e. in front of hobby tent) made for easy involvement of 'passerby parents' on the field, and can increase visitor participation.
- We lacked a proper plan for angel shifts. Next time, have 2-4 angels at all times roam around the tents/fields and generally help out. First shift doubles as roaming the fields to check if nothing has been broken and everything on the field is still child-friendly. Additionally, have kids-angels who help out (either together with their parents, or guided by the adult angels).
- Arrange in advance list of kids-angel tasks that can be done with minimal supervision and suitable materials/tools. Kids-angel shifts are not a substitute for parental supervision, and should not be occupational therapy. They do greatly help kids get into the spirit of the camp. Team:Deco in particular had suitable tasks, such as painting flags and signs, hanging flags from bushes, etc.
- Create a clear description of tasks for the angels and a clear point-of-contact for questions. Ideally, a team-member will talk to the angels at the beginning of their shift. This would also ease the distribution of meal-vouchers.
- Agree (and clearly communicate) in advance about the orga bands for spouses of team members, mainly because of meals in heaven. Having meals available greatly increases the participation of both parents in orga, FV and angel system. Confusion and discussion about this during the event is unpleasant and unnecessary. In advance confirm with heaven that if both parents have orga bands, kids of course can eat as well. Overzealous angels checking bands at mealtimes needed some reminding of this.
- A "boss-person" who tells others what to do is not required for FV. If tasks to be done are clear, families will pick them up themselves. However, a clear and well

visible team lead, that resides in the village and knows the wider community well, is very useful for coordinating the village, angels and keeping contact with core orga.

- All announcements in hard-copy at a central place is useful. Make sure it is properly announced where the announcements are.
- Most families visiting FV are very friendly and often have a lot of experience organising things and getting things done. Just ask or communicate that a problem exists and you will get all the help you need. Be aware there will be quite some families new to the community that do not necessarily know how it works, or young parents that are not yet experienced in camping with babies/small kids, therefore clear communication and clear tasks are key.

Non-families:

- There were quite some people camping on the family village without kids, as they were looking for quiet in the night. They are of course welcome, and it should be clearly communicated that kids will make noise early in the morning.
- Noise from other fields was a major problem. Organisation took care of this, basically at the cost of the parties others (not on FV) were having. The permit only allowed amplified music until 2 am, so in practice, the cost was not more than one hour. If FV wasn't moved due to rain, this would not be a problem. At SHA2017, a reason for noise could be inconsistent enforcement, caused by inter core orga misunderstandings. For next time, villages who want to party could investigate the very interesting world of Cardioid Sub Array (http://www.prosoundweb.com/channels/live-sound/the_end_fire_cardioid_subwoofer_array_made_visible/) that allows steering of the bass away from certain areas. Festivals use this a lot when minimising noise complaints and you'll even have more bass in the areas where you want it.

Safety:

- Having a test run for the “missing child scenario” with all teams involved is really useful. Everybody learned a great deal about this. For FV, this resulted in a clear action-plan to follow in case of this scenario.

Luggage and parking:

- The baggage-shuttle from parking to family village was mainly organised by having people from FV taking those shifts in the angel system. Additionally, you could explore possibility of organising dedicated luggage shuttle for FV: maybe by renting cargo bikes, or renting own golf cart and trailer.
- Coordinate with parking at the end of the event: Families generally pack more stuff or less efficiently than 'regular' visitors, and can also have kids (esp. toddlers) to mind during packing. Upon departure team parking likes to have cars on the field as briefly as possible. Either make families pack prepared, or have parking cut them some slack.

Facilities:

- The large play and workshop tents worked great. As did having lots of arts and crafts materials in the play tent and a decent amount of tables/chairs (20 tables/60 chairs workshop tent, 15 tables / 40 chairs play tent).
- Have a large open tent/tarp, such as the one on the angel field, where families can sit under, protected from both sun and rain. Rest of the facilities can be organised around it, for easy oversight.
- Bouncy castles (large and small), the ball pit and the sand box were excellent ideas and should come back.
- Inflatable fun land (hundreds of inflatable toys) was excellent. Possible: do not inflate all of them at once, but deploy extra as toys break/deflate.
- Bamboo stick game was used a lot and resulted in amazing structures.
- Buy much more glow sticks next time (we had around 150 this time) get at least 10x more.
- Next time order more sufficient long cables and power distribution boxes and lights from team power.
- Renting a large amount of LEGO and a large playing carpet should be considered, it was a great success at CCCamp 2015 and Fri3d 2016 in Belgium. Note: the CCC now has a very large collection of Duplo. Perhaps you can ask someone from the kid-space team if it can be used.
- A few high baby chairs were very useful, as were two commodes, for changing diapers. Arrange this in advance, and have at least 3 high baby chairs placed in Heaven.
- Diaper bins were barely used, most parents use the standard bins to discard their diapers. This worked fine, no smell problems.

Attached to this letter is the following:

- Missing child scenario plan for FV;
- Expectations and Requirements Plan;
- Budget and cost information;
- Tear-down plan;
- Blog announcement regarding FV;
- Email sent to all visitors with children regarding FV;
- Contact information for team FV SHA2017; and
- Copy of the FV wiki/orga-wiki pages.

We hope you find this information useful.

All the best and good luck organising the 2021 event!

Kind regards,

Team Family Village SHA2017

Lost Kid Scenario

- 1.Call 2222 (+31622005297)
- 2.Determine name, picture, description of clothing and language
- 3.Search
 - A.Find volunteers
 - B.Distribute name, picture, description of clothing and language
 - C.Split up in teams and split the area
 - D.First thing to look: ditch running alongside family village
- 4.Keep in communication with 2222

Expectations and Requirements Plan

We have limited resources, so we prioritise based on (cumulative) comfort tiers. Start with tier 0 and work our way to tier 2.

Tier 0: Provide similar camping experience to the other camping grounds

Expectations

- Camping with babies and kids in family village is similar to camping anywhere else at SHA2017

Requirements

- Plenty of toilets and showers close by
- Power everywhere
- Networking (cabled) everywhere
- Networking (wifi) everywhere
- DECT everywhere
- Plenty of garbage bins close by

Tier 1: Provide basic survival for camping with babies and kids

Expectations

- Family Village is a safe environment for babies and kids
- Family Village provides the basic infrastructure for camping with babies and kids

Requirements

- Contact Team:Entrance and Team:Infodesk to distribute child bracelets
- No other villages on the Rhodes and Wilson fields
- Arrange angel shift in the morning to clean up Family Village
- Signs signifying this is the family village
- Drinking water and lemonade
- Update wiki field descriptions to better reflect this is family village
- Quiet during the night (21:00 - 07:00) at the Wilson (sleeping) field
- Ask parents to have a recent picture of their kid standby in case of missing kid scenario
- Diaper disposition facility
- 2 Big tents with tables, chairs, power distribution and lighting for indoor playing, eating
- Area is safe for kids
- Outdoor space for outdoor playing
- Shared refrigerator
- First Aid kit suited for babies, kids and parents
- Text for booklet

Optional:

- Additional showers (babies and kids require more cleaning)
- Ask for the camper spaces closest to the harbor for kids/family
- Dishwashing area

Tier 2: Provide kids friendly environment with community projects

Expectations

- Community can create and organise the perfect experience

Requirements

- Create workshop program
- Set up mail for team ticket
- Contact Team:Logistics regarding receiving orders
- Arrange projection and audio
- Blog posting about family village
- Figure out our role for the workshops
- Communicate moving both tents to Rhodes field
- User:fhp contacts redlizard to update the map (done)
- Add commitments section to wiki
- Twitter account for communication

Teardown plan for Family Village

Expectations

- Tuesday end of day - Workshop tent empty
- Wednesday end of day - Indoor playing tent empty, Field empty (everything family related, except for tents of families doing teardown themselves)
- Whenever anyone leaves - Watersandbox removed

Tool required (what, when)

- Pliers

Actions Monday

- Create teardown plan
- Ask Knorrie for extra pickup-point on family village for baggage transport to parking
- Ensure AV is ready to be picked up (pickup at 18:00)
- Move ball pit alongside workshop tent, next to the road. (in the evening) (5-10 people or golf cart, use very gently turns to not destroy the grass) - done
- Discuss waste removal of the fence with team:waste- done.
- Return plastic drive-plates (requires golf cart and coordination with cressor to schedule this run) pls coordinate with cressor; we should do one run and also get the driving plates at other locations.

Actions Tuesday

- All tables/chairs from workshop tent outside on pallets (tables in stacks of 25, chairs in stacks of 15). Pallets arrive on Tuesday
- Completely empty the workshop tent
- Announce and mark things that can be taken home (they already be taken home on Tuesday)
- Bundle bamboesticks (cut rubber bands with knife for speed, and make sure rubber bands are not left on field)
- Deflate and pack bouncy castles
- Make sandpit+paint-thing+volleybalnet+mikado ready for pickup (put together, cleanup)
- Clean fields of all garbage, rubber bands, anything!

Actions Wednesday

- Take off the tarp from the ball pit and drop it at the Coleman Povillion next to the big tree (with Cyber Tape) with the Hammock
- Remove fences alongside ditch. Fence waste can go to the large waste container. (Grofvuil container) pls roll up as tight as possible.
- Pickup bouncy castle (10:00)
- Pickup sandpit+paint-thing+volleybalnet+mikado
- Move ball pit to logistics
- Move bar outside of playing tent for pickup
- All tables/chairs from playing tent outside on pallets (tables in stacks of 25, chairs in stacks of 15).
- Return the black power extension cables/rolls to team:power
- Return the emergency lights to team:power
- Return the lamps to team:decoration
- Completely empty the playing tent
- Remove tape (red/write) and pecks
- Final check of field: should be completely empty (except for tents of families doing teardown themselves)

Actions Thursday

- Pickup ballpit from logistics

July 7th 2017

We have three fields: one for you to sleep with your parents, brothers, and sisters ([Babbage field](#)); one field with a big tent for playing outside, playing inside and a place to just sit ([Boole field](#)); and one field with a big tent for workshops ([Clarke Field](#)). Of course, you are welcome everywhere on SHA2017, but the Family Village is a good place to start your adventures.

photo by [Julia Wolf](#)

Since parents are always tired in the evening and at night, we have good news for them: the family village is the quietest place of the entire SHA2017. The field used for sleeping (Babbage field) even has a [noise level](#) of 1, and yes, these numbers go up to 11 all the way at the other side of the camp on the Wozniak Field. At Babbage field, everybody is expected to be quiet after 21:00.

Whether you want to build a [sand castle in the sand pit](#) or a large [bridge with Bamboestiek](#), we've got you covered! Like the rest of SHA2017, you can put your parents to work organising awesome activities for you and other children. For example, Anykey will bring an awesome [solar-powered water and sand playbox](#). We are currently planning a few other projects, but we could really use some more hands to organise awesome activities. Parents willing to help out can head over to [the wiki](#) or #sha2017-family on IRC to join or start new projects.

Please tell your parents not to drop you off unattended at the Family Village, we do not offer childcare! There are many activities and things to do together with your parents. If they want to enjoy the event on their own, they could easily make friends with other parents and organise some informal child minding.

We hope to see you at SHA2017. If you are planning to stay with your parents, please have them sign up on the [wiki](#) so we know you are coming!

Subject: Introducing Family Village and SHA2017-specific child safety tips

Dear parents and guardians,

Since you are visiting SHA2017 with kids, we thought it useful to introduce you to the Family Village. If you are not interested in the Family Village, you can scroll down directly for some SHA2017-specific child safety tips. If you are reading this, but think it should instead be addressed to your parent or guardian, please forward it to them.

Family Village is a group of families who camp together on a special area of the camp. All families are welcome, you can just show up and put your tent at [Babbage field](#) (quiet time after 21:00). If you are staying somewhere else on the camp, you can walk over to [Boole](#) and [Clarke](#) field where the playing activities are organized. If you already know you want to stay at Babbage field, you can create an account at the wiki and add yourself to the [Family Village wiki page](#).

All activities are organised by the families themselves. Here are some examples of projects that are ready to go:

- [Bamboestiek](#): 1500 pieces of bamboo sticks of various sizes (60/90/120cm) and 10 kilos of rubber bands for everybody to build amazing things like bridges and towers.
- [Frisbee](#): Lots of frisbees and baskets to play discgolf, kamjam or just throw frisbees.
- [Inflatable fun land](#): A fun area for kids and adults to hang out and play (There is NO water involved in this Inflatable Fun Land!)
- [Sand pit](#): Two sand pits, one for the smallest children and one for the bigger ones.
- [Taekwondo](#): Introduction training into this Martial Art with fun and some kicking.
- [Water/Sand playbox](#): Completely self-contained, water is circulated and uses solar power/battery for the pumps.

There are many more projects in progress, and we warmly invite you to have a look, help out or start your own at the [Family Village Cluster on the wiki](#). Additionally, have a look at the awesome [angel system](#): visitors can sign up for shifts to prepare the family village (angel type: Family Village: Thing Finder) and many other things to help out.

Since we'll have two large tents to use for indoor playing and workshops, it would be nice to have some shared facilities like a microwave, water cooker, etc. For this, we have organized an "I'm going to SHA2017 and I'm bringing ..." [list at the wiki](#). Feel free to add item you bring to the list and have a look at the wish list.

Child safety is extremely important. Here are some tips specific to SHA2017:

- Get a child-bracelet at the infotent or the family village to write your phone number. If you don't want to attach a bracelet to your kid, permanent marker also works.
- Take a recent picture of your kids and have it standby. Obviously, we all have a million pictures of our children, but if your kid is missing, having this picture standby saves valuable time.
- First aid can be contacted through the safety central post via DECT: 2222 or +31 622005297, they will come to you for small and big situations (they have a full medical team on-site). Basic first aid kits are also available at the Family Village tents if you are looking for a bandaid with a nice picture.
- Small children should not be left unattended. If they are found without parent/guardian, the missing parent/guardian scenario is initiated to find you. Also, Family Village is not a day care.

- Keep a very close watch around the water. Especially the canal (Nulderauw) is very cold, has strong currents and heavy traffic. So use the pond at flowers field and still keep a very close watch on your children. You can borrow floatable swimming bands at the Family Village and the harbour. Note: using those floatable swimming bands is not a substitute for actually watching your children.
- The harbour is a great place to be, but has [additional rules](#). Regarding children, the most important rule is "Children up to 12 years are not allowed to play or be alone in the harbour and the surrounding area (up to half of the Hopperfield). Watch your children since water is not without risk!"

If you have any questions, or would already like to meet fellow families, you can find us:

- At IRC: #sha2017-family (irc.freenode.net)
- On twitter: <https://twitter.com/SHA2017Family>
- On the wiki: https://wiki.sha2017.org/w/Cluster:Family_Village
- On the mailinglist: <https://lists.sha2017.org/cgi-bin/mailman/listinfo/family-village>, or reply to this email
- On SHA2017: DECT number KIDS (5437)

See you all at SHA2017!

Intro

Family Village is a group of families who camp together on a special area of the camp. All families are welcome, you can just show up and put your tent at **Wilson field** (quiet time after 21:00). If you are staying somewhere else on the camp, you can walk over to **Rhodes Field** where the playing activities are organized. If you already know you want to stay at Wilson field, you can create an account at the wiki and add yourself to the **Family Village Sleeping Field**.

All activities are organised by the families themselves. Here are some examples of projects that are ready to go to:

- Bamboestiek**: 1500 pieces of bamboo sticks of various sizes (60/90/120cm) and 10 kilos of rubber bands for everybody to build amazing things like bridges and towers.
- Frisbee**: Lots of frisbees and baskets to play discgolf, kamjam or just throw frisbees.
- Inflatable fun land**: A fun area for kids and adults to hang out and play (There is NO water involved in this Inflatable Fun Land)
- Sand pit**: Two sand pits, one for the smallest children and one for the bigger ones.
- Taekwondo**: Introduction training into this Martial Art with fun and some kicking.
- Water/Sand playbox**: Completely self-contained, water is circulated and uses solar power/battery for the pumps.

There are many more projects in progress, and we warmly invite you to have a look, help out or start your own at the **Project list**. Additionally, have a look at the awesome angel system: visitors can sign up for shifts to prepare the family village (angel type: Family Village: Thing Finder) and many other things to help out.

Since we'll have two large tents to use for indoor playing and workshops, it would be nice to have some shared facilities like a microwave, water cooker, etc. For this, we have organized an "I'm going to SHA2017 and I'm bringing ..." list at this wiki. Feel free to add item you bring to the list and have a look at the wish list.

Child Safety

Child safety ais extremely important. Here are some tips specific to SHA2017:

- Get a child-bracelet at the infotent or the family village to write your phone number. If you don't want to attach a bracelet to your kid, permanent marker also works.
- Take a recent picture of your kids and have it standby. Obviously, we all have a million pictures of our children, but if your kid is missing, having this picture standby saves valuable time.
- First aid can be contacted through the safety central post via DECT: 2222 or +31 622005297, they will come to you for small and big situations (they have a full medical team on-site). Basic first aid kits are also available at the Family Village tents if you are looking for a bandaid with a nice picture.
- Small children should not be left unattended. If they are found without parent/guardian, the missing parent/guardian scenario is initiated to find you. Also, Family Village is not a day care.
- Keep a very close watch around the water. Especially the canel (Nuldernaauw) is very cold, has strong currents and heavy traffic. So use the pond at flowers field and still keep a very close watch on your children. You can borrow floatable swimming bands at the Family Village and the harbour. Note: using those floatable swimming bands is not a substitute for actually watching your children.
- The harbour is a great place to be, but has additional rules. Regarding children, the most important rule is "Children up to 12 years are not allowed to play or be alone in the harbour and the surrounding area (up to half of the Hopperfield). Watch your children since water is not without risk!"

Village Rules

In addition to the child safety listed above:

- Family Village is not a day care. Do not leave your child unattended.
- There will be Water and Lemonade, which is very useful in hot weather. Food is not provided. Please bring your own food for your children. There is a refrigerator where you can keep your baby food. Please note: this refrigerator is ONLY meant for baby food etc. For your own food, you can obviously bring your own or use the food trucks, we hear they're going to be awesome.
- We hope to have great weather, and in this case, you need to keep in mind that your child needs special care. Be aware that your child will be outside most of the day. Make sure you use a water-resistant sunscreen with a high factor and provide fresh fruits and food. The family Village provides water and lemonade, but NO food.
- Since children and their caretakers need their rest, the Wilson field must be quiet after 21.00.

Contact

If you have any questions, or would already like to meet fellow families, you can find us:

- At IRC: #sha2017-family (irc.freenode.net)
- On twitter: https://twitter.com/SHA2017Family
- On the wiki: https://wiki.sha2017.org/w/Cluster:Family_Village
- On the mailinglist: https://lists.sha2017.org/cgi-bin/mailman/listinfo/family-village, or reply to this email
- On SHA2017: DECT number KIDS (5437)

Workshops and Activities

We have found and sometimes organised the following workshops and activities that are interesting for children. Feel free to add more to this list. If you want to organise something in the workshop tent on Rhodes field, please contact us at family-village@lists.sha2017.org for scheduling.

Date	Start	End	Location	Description	Event link
Friday 2017-08-04	12:00	16:00	Rhodes Field	Hop on the train to ride around the camp	more info
Saturday 2017-08-05	10:30	14:30	Workshop Tent	Postapocalyptic Goggles-Workshop. We build postapocalyptic goggles and jewellery from leftovers of human civilisation / of SHA2017.	more info
Saturday 2017-08-05	12:00	16:00	Rhodes Field	Hop on the train to ride around the camp	more info
Saturday 2017-08-05	10:00	11:00	Chriet Titulaer Island	Climbing. The starttimes are 10am, 11am, 13am, 14am and 15am. The workshop of 11am will only take place, when the workshop at 10am is filled with 12 people etc. Age from 7 and up. Subscription list is at the infodesk.	
Saturday 2017-08-05	15:00	16:00	Workshop Tent	Balloon folding workshop. How to amaze you friends and kids with useless skills. Balloon folding looks complicated, but actually isn't. If you ever wanted to learn this skill now is your change.	more info
Saturday 2017-08-05	16:10	18:10	Workshop Tent	Taekwondo for Kids. During SHA on the 5th of August there will be a Taekwondo training for kids (and parents).	more info
Sunday 2017-08-06	11:00	16:00	Chriet Titulaer Island	Archery. The starttimes are 11am, 12am, 13am, 14am and 15am. Age from 7 years and up. Subscription list is at the infodesk.	
Sunday 2017-08-06	10:00	11:00	Workshop Tent	Making bombs How to go off with a (loud) bang. We'll make small quantities of hydrogen gas and let them explode.	more info
Sunday 2017-08-06	13:00	15:00	Workshop Tent	Hack in the class: Arduino	more info
Sunday 2017-08-06	14:00	15:00	Indoor Playing Tent	Arts and crafts workshop.	
Sunday 2017-08-06	15:00	16:00	Workshop Tent	Hack in the Class: How to CTF for kids!	more info
Sunday 2017-08-06	16:00	17:00	Workshop Tent	Raspberry Pi Robot Programming	more info
Monday 2017-08-07	10:00	12:00	Workshop Tent	Workshop making owls of clay and dissecting owl pellets. Make your own owl from clay, or dissect an owl pellet to discover the bones from its last meal.	more info
Monday 2017-08-07	12:15	13:00	Workshop Tent	Workshop Scratch. Learn to program in scratch. Ages 6 to 8. Bring a laptop!	
Monday 2017-08-07	13:00	14:00	Workshop Tent	Cryptokids Workshop for kids. Get insight into the technical structure of the Internet, how data works, who is actually in charge online and why privacy matters. But more importantly, we try to empower you and provide tools to be more secure and to take charge of your own data when you surf the web.	more info
Monday 2017-08-07	14:00	15:00	Alexander Field	Flight demonstration with owls and bird of pray. During this demonstration on Alexander Field, we will show how several owls and birds of pray fly, and tell you something about these awesome creatures.	more info
Monday 2017-08-07	15:30	16:00	Workshop Tent	Programmer mind. A game where we program humans as robots with simple instructions (walk 5 steps, turn left, etc) to accomplish tasks. Age 5 and up.	
Monday 2017-08-07	16:15	17:00	Workshop Tent	Marshmallow challenge! In teams of 4 you will compete to create the highest tower of marshmallows and spaghetti. Age 5 and up	

Projects

Most activities within the Family Village will be coordinates as individual projects. Want to organize something cool for the kids? Create a project so we can track its status!

If you require a budget: fill in the Budget Required field in the form so the team leads can decide whether to fund your project. If you have a budget, you can buy it yourself and declare costs: see Team:Finance/Procedures for the details on declaring costs, and CC a copy of the email to fhp@sha2017.org. Alternative is providing an exact shopping list on the project page with links to a webshop, and ask User:fhp to order it.

After the event

Make sure your project has an exit plan written on the wiki before buying anything! We cannot leave anything at the field, and capacity at the trash bins has to be reserved at Team:Waste!

List of projects

Project	Person Responsible	Status	Budget Required	Budget Granted	Comments	Field
Village:Family Village/Ballpit	You?	ready	600	600		Village:Family Village Playing Field

Bringing

I am coming to the Family Village and I'll bring:

- User:haakjes
 - Labelmaker (DYMO LabelManager Rhino)
- User:Keyy
 - Ducktape, basic tools
 - solder iron, hot glue pistol
 - PMR Walki Talkies
 - Air pump to pump things up with. Both manual, electric and compressor
 - Watercooker
 - Microwave

Wishlist

- 2 microwaves (User:Anykey will bring one)
- 2 watercookers (User:Anykey will bring one)
- lounge chairs and couches for chill out area (but you have to take them home afterwards!)
- Games and toys for everyone to play with

Estimation

Estimate kids attending	
0 - 5 Year old	80
6 - 11 year old	117
12- 17 year old	98
Total	295

Expectations

We have limited resources, so we prioritise based on (cumulative) comfort tiers. Start with tier 0 and work our way to tier 2.

Tier 0: Provide similar camping experience to the other camping grounds

Expectations

- Camping with babies and kids in family village is similar to camping anywhere else at SHA2017

Requirements

What	Status	Who	Notes
Plenty of toilets and showers close by	Done	User:Sigyn	Attila says: "showers are done. They will be on Wilson field"
Power everywhere	Done	User:lmstr	<ul style="list-style-type: none">Team Power (benadski): "Yes, all of those fields will have ample of power! :) Enough to run all of the kitchen equipment you mentioned and more."
Networking (cabled) everywhere	Done	User:lmstr	<ul style="list-style-type: none">Confirmed by Attila, wireless and wired network will be available, People have to bring their own CAT cables (long ones preferably, additional switches to connect groups of tents).HP 2824 switch for each large tent on Rhodes.NOC layer on https://map.sha2017.org/ shows approximate Datenklo locations
Networking (wifi) everywhere	Done	User:lmstr	<ul style="list-style-type: none">see above
DECT everywhere	Done	User:haakjes	<ul style="list-style-type: none">Two from team poc: There will be full DECT coverage on the way to the Babbage fieldTwo from team poc: You get an extension number in a special 12xx range (and an alias number if desired e.g. FMLY/3659) and we can subscribe DECT phones to this number. If someone rings, one of the subscribers could answer to this callFMLY/3659 is now reserved for Family Village call groupKIDS is also reserved for Family Village call group
Plenty of garbage bins close by	Done	User:Sigyn	Answer from Team:Logistics/waste : <ul style="list-style-type: none">We plan to place a group of bins (240 liter 'kloko' rolcontainer) at the toilet-block on Wilson fieldOn the bin will be a label with a website (and QR code) to report how full the bin is.When it's nearing full, or when we suspect it needs replacing: we will. If needed you could call DIRT (on DECT) for emergencies (the site is overflowing) or you could ask a volunteer to empty the bin and bring the bag to the waste-press at the foodcourt.If needed, we have bins in reserve if the supplied quantity isn't enough to last you one day.We only have one point at Clark field for the simple reason is that we need to reach each droppoint. Camping visitors are used to taking a short walk to get rid of their trash so this is the compromise we ask of each visitor.Currently we haven't planned a set schedule yet, we will let you know.

Tier 1: Provide basic survival for camping with babies and kids

Expectations

- Family Village is a safe environment for babies and kids
- Family Village provides the basic infrastructure for camping with babies and kids

Requirements

What	Status	Who	Notes
Contact Team:Entrance and Team:Infodesk to distribute child bracelets	Done		<ul style="list-style-type: none">User:haakjes sent email to entance and infodeskWe can put a small table with basket of bracelets and permanent markers (and scissors) near the entrance, people can help themselvesWe can put a small basket, permanent markers, scissors in the infotent Next step: buy that stuff
No other villages on the Rhodes and Wilson fields	Done		Contacted team:villages and team:terrain
Arrange angel shift in the morning to clean up Family Village	Done	User:lmstr	we ask for 2 angels during day-time to be around on the field and help out with the workshops, terrain, bouncy castly, in generally walk around, make sure the field is cleared from stuff left my nightly visitors.
Signs signifying this is the family village	Done	User:Sigyn	Ask Team:Decoratie ? They mailed about signs/flags that are needed. Call Moem 28/6 to ask what is still possible to make for FV. Somewhere i saw a nice picture of the Family Village signs. I assume they are even more cool in real life :D
Drinking water and lemonade	Done	User:Sigyn	Asked team bar. A tap point will be provided with pitchers. Todo: organise a hose from the tap to the tap point. Officially there will be no point available to get water from. We need to "hack" a waterhose and a good connection.
Update wiki [1] and [2] to better reflect this is family village	Done	User:haakjes	
Quiet during the night (21:00 - 07:00) at the Wilson (sleeping) field	Done		Added to village rules. Will be difficult on the new location.
Ask parents to have a recent picture of their kid standby in case of missing kid scenario	Done		Added to village rules
Diaper disposition facility	Done	User:Sigyn	Diaper bags and bins have been ordered by Sebastius via Logistics Shopping. They will put the following text on the bins: "Diapers must be wrapped in plastic or else we'll send them of to DNA research and grow a clone".
2 Big tents with tables, chairs, power distribution and lighting for indoor playing, eating	Done		Tent is provided by organisation, Tables and Chairs are ordered. Emergency exit lights and fire extinguisher are provided.
Area is safe for kids	Done		Implicit in the village rules and setup of the village.
Outdoor space for outdoor playing	Done		All outdoor space activities are handled by projects
Shared refrigerator	Done	User:Sigyn	Asked team bar
First Aid kit suited for babies, kids and parents	Done	User:Sigyn	Team:Safety will provide some kids-kits
Text for booklet	Done	User:Sigyn	

Optional

What	Status	Who	Notes
Additional showers (babies and kids require more cleaning)	Done		Attila says: "showers are done. They will be on Wilson field"
Ask for the camper spaces closest to the harbor for kids/family	Done		Campers at the village itself is impossible.
Dishwashing area	Done		Ask if it is included with the toilets. No, there are enough places on the field to clean your stuff.

Tier 2: Provide kids friendly environment with community projects

Expectations

- Community can create and organise the perfect experience

Requirements

What	Status	Who	Notes
Create workshop program	pending	User:Sigyn	Contact with Team Content about proposals in Frab. Had contact, now moving on with filling the content. Please put the workshops also on a list in wiki, like the projects so all of us can find them. Would someone be so nice to make this? :))
Set up mail for team ticket	Done	User:fhp	Set up mail to contact parents to help out the FV with projects / volunteering. Email is drafted, will be send 2017-07-21
Contact Team:Logistics regarding receiving orders	Done	User:fhp	Follow instructions on this page . Contact Team:Logistics for large / strange packages.
Arrange projection and audio	Done	User:fhp	Team productiehuis will arrange an AV setup for the workshop tent.
Blog posting about family village	Done	User:fhp	In progress at [3]
Figure out our role for the workshops	Done	User:Sigyn	We have to do everything regarding hosting (managing the workshop tent, welcoming the presentator, setting tables, etc). So we'll need some angels for that
Communicate moving both tents to Rhodes field	Done	User:fhp <ul style="list-style-type: none">User:fhp contacts redlizard to update the map (done)	
Remove moderation from mailing list	Done	User:Sigyn	Contact Rolf. Rolf partly removed the moderation from the mailinglist for a reason.
Add commitments section to wiki	Done	User:haakjes	Start with asking for 2 microwaves, 2 watercookers, chairs and couches for the chill out area (must be taken back unless you get permission from Logistics/Waste to leaving them)
Wiki setup similar to the CCC Camp Family Village wiki page that invites community to enter their own projects/events	Done	User:fhp	Project setup is moved to main wiki.
Twitter account for communication	Done	User:lmstr	Contact lmstr for access

Shopping List

What	Status	Who	Notes
Stationary for making signs, notes (paper, markers, scissors, tape, ropes)	Done	User:Sigyn	
Printers	Done	User:Sigyn	Fish has A3 printers we might be able to borrow
Tools	Rejected	User:Sigyn	
~400m Flatterband	Todo		Don't buy red/white which is used by Team:Safety
2x gaffer tape	Done	User:Carola	
Toys for sandpit (unless included in sandpit delivery)	Todo		User:fhp handles sandpit order. Bought a bunch of toys at the action
Child wristband for telephone number	Done	User:Carola	We bought 400 of these http://www.sos-bandjes.nl/10-SOS-bandjes-regenboog
Hose from the tap to the tap point.	Postponed		For the drinking water (probably going to do this during the event, when we know what we need exactly)
Cable ties (various lengths, can't have enough of this)	Done	User:Carola	
10-20 power strips (the more sockets the better) with safety covers ("shutters")	Done	User:Carola	<ul style="list-style-type: none">Ordered 20 power strips via logistics (Evert Jelle / Supermier)
DECT phones	Done	User:Carola	Dect numbers and phones (2x) are arranged.
Order 40 tables (176x70) / 160 chairs	Done	User:Sigyn	Added request to Tables_order
emergency lights in the tents	Done		Provided with the tents
2 fire extinguishers in the tent (one each)	Done		Provided by Team:Safety
big pile of bandaids with nice pictures from aliexpress	Done	User:Sigyn	Provided by Team:Safety
2x EHBO basics	Done	User:Sigyn	Provided by Team:Safety
